Other dimming driver

METEOR VX Driver

### No More Flicker with VX Driver

METEOR integrates proprietary VX Driver, advanced non-flickering technology, to all dimming options (0-10V and DMX). Common flickering issues will no longer appear on smartphone or video camera recorded material.

### 1% is Not Enough

DMX by other brands often dims to 1% which may still be too bright for applications such as churches or theatres. METEOR's proprietary DMX dimming technology dims down to 0.4% enabling dimming for more demanding applications.
